

# WØYVA

**\*\*\* STATIONS \*\*\***

Like so many, I keep changing things. This photo is the most current (11/04)  
CE 100V in the foreground; KW-1/75A-4/HRO-500/312A-1 for AM;  
On the desk is a CX-11A used with an Alpha 77SX (rear view shown, with  
a pair of Bird wattmeters on top); Collins S-line and antenna tuners.

**Current configuration:** I now am the happy owner of Signal/Ones' two best efforts; the MilSpec 1030 (on the left) and the CX-11A (on the right). The Collins S3 line is on the second shelf. Not shown are the amplifiers; a 30S-1 for the S-line and a Alpha 77Sx/Dx for the Sig/Ones.

**Desk:** ARD 230 Amplifiers - DDS-2A - Keyers - SM-3 microphone - HRO-500  
**Bottom row:** Rockwell 312B-4 and KWM-2A - Signal/One CX-11A - 30L-1

**Middle** row: Antenna/tower/rotator controls - **32S-3A** - 75S-3C - 312B-4  
**Top** row: 30L-1 - Magnum Six - "[Collins](#)" antenna tuner- DL-1 - KW matchbox

KW-1 and 75A-4 AM Station

The Golddust corner! KWS-1 - 312A-1 (302C-1 on top) - EV664 - 75A-4

My wife said I should have a photo with me in it ... so ...

Another view of the Golddust corner with our "watch cat"

An example of a late '50's station - 75A-4 and CE 100V. Great fun!

CE station - 100V/MM-2/600L amplifier

Drake Station - C-4/MN-2000/L-4B/T-4XC/R-4C/MN-4/AC-4
